

# DIGITIZE THE SALES ROOM

## THE 'EVERYWHERE POS'

The virtual sales room offers salespeople the opportunity to stay digitally close to the customer.

By inviting customers into the virtual room, the products can be experienced in 3D. Due to the high-quality technical implementation, the product can be presented from all sides and in real-time - while the sales assistant can interact with the customer and provide further details.

**Empower your sales team to more customer engagement!**
